

KOSH Homepage Review — Part A: Copy & Content Issues

Issues with text, messaging, value propositions, and content strategy. Most are simple string updates — no code logic changes needed.

Total items: 10

A1. Hero subtitle is feature-focused, not benefit-focused

File: `src/components/sections/HeroSection.tsx`

Current: "USD accounts, a global Visa card, and instant payouts. All powered by stablecoins." **Problem:** Lists features instead of outcomes. **Suggestion:** "Get paid from anywhere. Spend everywhere. Keep more of what you earn."

A2. Social proof badge is vague

File: `src/components/sections/HeroSection.tsx`

Current: "Chosen by thousands across the globe" **Problem:** "Thousands" is unspecific and reads as filler. **Suggestion:** Use real numbers if available — "12,000+ users" or "Used by freelancers in 90+ countries"

A3. Notification overlay — both show "Received"

File: `src/components/sections/HeroSection.tsx`

Current: "\$4,500 Received" and "\$2,400 Received" **Problem:** Only shows one side of the money lifecycle. **Suggestion:** Change second to "\$850 Sent — Card purchase at AWS" to demonstrate both receiving AND spending, reinforcing the "one account for everything" message.

A4. FourthSection stats need verification

File: `src/components/sections/FourthSection.tsx`

Current: "5% Cashback on Hotel Booking" and "10% Reward Points on each spend" **Problem:** These sound unusually high. If real, make them more prominent. If aspirational, tone down to avoid misleading users.

A5. Business CTA copy is generic

File: `src/components/sections/BusinessCTASection.tsx`

Current: "Custom pricing, dedicated support, and multi-user controls." **Problem:** Generic B2B language that could describe any SaaS product. **Suggestion:** "One dashboard. Every team member's spending. Full control."

A6. FAQ answers are too vague

File: `src/components/sections/FAQsSection.tsx`

Problems:

- "...with fiat on and off-ramp support based on your account region and verification level" — just say which countries/currencies you support
- "...including account verification, monitoring, and audit-ready transaction records" — name specific certifications or partners

Specific FAQ answers massively increase conversion because they address real objections.

A7. Trust Section testimonial is a placeholder

File: Trust/Social proof section component

Current: "I personally use Kosh to manage my crypto finances..." attributed to "Placeholder Name, Co-founder at Company" **Problem:** If visible in production, this severely damages credibility. Replace with a real testimonial or remove entirely.

A8. "Fraud Monitoring" marked "Coming Soon"

Problem: Having "Coming Soon" on fraud monitoring in a financial product is concerning. Remove this card until the feature ships, or reframe as "Advanced fraud monitoring" without the coming-soon tag.

A9. Page title is too basic for SEO

File: `src/app/page.tsx`

Current: "Koshmoney" **Suggestion:** "KOSH — The Global Financial Account for Freelancers | USD Accounts, Visa Card & Stablecoin Payouts"

A10. Social media links use old brand (copperx)

File: `src/components/sections/FooterSection.tsx`

- Telegram: `t.me/copperxcommunity`
- YouTube: `youtube.com/@copperxhq`

Users who click these will be confused by the "copperx" branding. Update handles or set up redirects.

Summary: Most items are simple string updates. A6 (FAQ rewrite) and A7 (testimonial replacement) need real content from the team.
